Welcome to Passage House Dental Care

Thank you for choosing Passage House Dental Care where we provide modern dentistry for all. We are a committed team of professional dentists and dental nurses. It is our ongoing practice policy to promote dental health at all times through private and NHS appointments. In recommending regular check-ups we hope to minimise the need and cost of potential future treatments.

You can feel assured that Passage House Dental Care is a well-established practice. We feel extremely proud of our highly commendable track record of patient care in all areas of dentistry. The practice is also proud to be part of the Good Practice Scheme, which is administered by the British Dental Association so you can expect top quality care in a top quality environment every time you visit!

The practice is owned and managed by Tony and Jacqui Vallance and Brad Hall. Three Associates support the practice. We also have an Orthodontist, which provides treatment for children and adults and a Hygienist.

As well as providing NHS dental care, we also offer a wide range of cosmetic dentistry such as white fillings, tooth whitening, adult orthodontics and other treatments that are not available under the NHS. Our private fees are competitive without the compromise on quality or care. It is our policy to give patients full information about the cost of their dental work. A written estimate and treatment plan is always available for patients. Remember to ask your dentist for this.

We try to make payment as straightforward as possible. Our policy is that payment is due on the day of treatment. If you are undergoing a 'treatment plan', please discuss with your dentist when to pay.

If you are unable to keep your appointment please let us know as soon as possible so that we can give the appointment to someone else.

We recommend that you read our practice leaflet, which can be found on our website or from our reception.

We also care about building up a professional patient/dentist relationship, therefore we have a great website for you to view, a practice newsletter and we can send texts to remind you of your next appointment. Enjoy!

We look forward to seeing you soon.

The Passage House Dental Care Team.
