

A new Dentist!

We're welcoming our new dentist, Dr Fiona Welborn. Fiona joins us from a career in the Forces. Fiona joined us in September 2018 and has already seen many patients. Thank you for making her feel so welcome. Fiona joined the practice just as Dr Kate Leeming left to pursue her career in Sedation. Fiona will be working Tuesdays and Fridays.

We wish Kate the best of luck.

Cancelling Appointments

As a practice we would like to keep the Private fees down. We feel that we must limit the short notice cancellation and missed appointments, I hope you understand and agree that the following will help us do this:

We are kindly asking for Private patients to pay £20 of their first check up upon booking. All private patients have a cancellation charge of £20 per check-up or per 30 mins of appointment time booked thereafter*

Hygienist appointments have a cancellation fee of £10 per 20 minutes booked*

*Both are non refundable or charged if less than 24 hours notice is given for whatever reason, or the appointment is missed altogether.

NHS appointments: if you fail to attend, or don't give sufficient notice on two consecutive appointments we may not be able to offer you future appointments.

Introducing our Specialist Orthodontist

Dr Amelia Jerreat

BDS MFDS MSc (Orth) MOrth FOrth

Dr Amelia Jerreat, Specialist Orthodontist

We are extremely proud to have Amelia Jerreat, a Specialist Orthodontist, now working at Passage House Dental Care.

Amelia will be working with children at the practice to ensure they get the straight teeth they want. They will be in expert hands as Amelia guides them through the treatment process. Ask about Orthodontics at your child's next visit.

Did you know:

Orthodontics isn't just for children.

Do you hide your teeth when you smile?

Whilst Amelia achieves amazing results for children's smiles, she can also achieve fantastic results for adults too. Amelia would like to talk to adults if they are interested in having orthodontic treatment.

There are various treatment options to choose from to suit your lifestyle and needs, including tooth coloured brackets and brackets on the back of your teeth. If your teeth aren't as straight as you like and you're fed up with hiding your smile, do something about it - speak to Amelia.

What is Orthodontics?

Orthodontic treatment is used to improve the appearance, position and function of crooked or abnormally arranged teeth. Orthodontic treatment can straighten the teeth and move them into a better position.

Mouth Guards

Does your child need a mouth guard for sport?

We can help.

Ask your dentist today.

Tooth Whitening

Please remember that the safest way to carry out tooth whitening is in conjunction with your Dentist.

Only dentists can supply you with tooth whitening products with higher percentage of whitening ingredients eg Hydrogen Peroxide (over 1%).

Please be wise and safe - ask your Dentist for information.

New Hygienist

Nicola (Nikki) Choi, our new hygienist starts in November 2018.

We wish Jasmine the best of luck in her new practice.

Finance Plans

For your convenience we offer 0% interest free finance schemes. Visit our website for more details. (Passage House Dental Care is authorised and regulated by the Financial Conduct Authority)

Dental Implants

Dental Implants can be the most long lasting way of replacing missing teeth. Not only do they fill in gaps from missing teeth, but they can help support fixed bridges and dentures.

Dr Brad Hall. Special Interest: Dental Implants

It is essential when choosing a Dentist for Dental Implants, that you ensure they are highly qualified in this area of dentistry.

We are very proud to have Dr Brad Hall who has a special interest in Dental Implants. Brad is highly qualified in this field, gaining a distinction in his MSc Implantology (Masters in Dental Implants) and has accomplished highly successful treatments.

The whole surgical procedure can take place at Passage House Dental Care. There are two parts to an implant. First the Implant. This is placed in the jawbone and acts like the root of the tooth. Second, the replacement crown (top part of tooth that you can see) is fixed onto the implant.

Ask your dentist about Dental Implants today.

Conscious Sedation

Are you anxious or nervous about having dental treatment?

We are very lucky to have Dr Adam Gardener who has a special interest in Conscious Sedation at Passage House.

His calm approach to treatment and sedation has put many patients at ease.

Ask your dentist today.

We look forward to seeing you soon.
